Donate

with Bitcoin

with BitcoinCash

1MG7oDAzesJrh6ZDmg1AJTZSPNI

This group gathered **8.7BTC** , they get the most donations in the kizuna platform.

What you can do with the “KIZUNA platform” ?

- 1 Choose high quality NPOs and NGOs**
- 2 Educate NPOs and NGOs on the possibility of accepting crypto currencies**
- 3 Educate users on how to set up wallets safely,
and how to convert from fiat currency to crypto currency.**
- 4 Use the KIZUNA platform to cooperate with others and request donations**

What do you think is problematic about that?

1

It is difficult to judge whether the organization can be trusted.

2

I do not know if my donation is being used properly.

3

The number of people whom we can reach is limited.

What about “crypto currency”?

Crypto currency includes recorded data that can not be tampered with using a technology called blockchain.

What about “crypto currency”?

✓ No Borders

**There are no borders when using cryptocurrency.
You can reach the entire world.**

✓ Expanding Considerably

**Rather than being limited to calling on passersby at the train stations,
the number of people whom can be reached using crypto currency is
expanding considerably.**

Binance Charity Foundation アップデート(6月25日)

- 創設：2018年10月
- プロジェクト数：今までに17個（現在15個（2つは終了））
- 現在までの成果：寄付総額509.89BTC = 5,685,245USD = 6億760万円
寄付者963人
- プロジェクト内容：①Binance Lunch for Children（ウガンダの13校）[下記詳細](#)
②ノートルダム教会火災支援募金（35,480USD = 370万円）
③ALS “Voice Your love”（言語障害の方の支援（509.61USD = 54,000円））

Binance Lunch for Childrenについて

2019年2月に開始。現在ウガンダ（カンパラ地区、ジンジャ地区）の13校に給食や文具を提供している。

- ・内10校へは給食の提供
- ・内1校へは太陽パネル（22608USD=240万円）
- ・内1校へはLEDスクリーン（3USD=320円）
- ・内1校へは教科書や文房具（16973USD=180万円）

※ 寄付されたBNBは、現地のNPOや業者のウォレットに送金され、Binance Uganda を通してウガンダシリングに交換できる。

※ 1BNBで生徒一人の1学期分（2ヶ月間）の給食をまかなえる

Chapter 1

Introduction of NFS

Executive Summary - Why this is valuable

Pain Points from industry

High interest in blockchain but not sure what needs to be done

→ *Fighting against stereotypes & high uncertainties*

Blockchain related information/seminar is too focused only in technology

→ *Too high tech hurdle for business developers*

Know very little what others are doing

→ *Everyone is fighting their own battle repeating faults and mistakes when it's better to fight together*

Different level of understanding in/between corporates

→ *Very limited research / network / access other than individual personal interest*

Why it is worth participating

Exclusive Information - Access to research on extensive deep blockchain business adoption benchmark cases

→ *Know what is being done from global peer companies with high quality research report*

Get Connected to Peers - Networking with non-crypto players engaging blockchain from different scenes

→ *Earn contact points to share pain points and lessons to figure the out way together*

Find Practical Partners - Connect to global blockchain experts in different part of value chain

→ *Find highly trusted blockchain companies you can partner up to develop your blockchain initiative*

NFS Seminar - Our Focus

Non-profit seminar with local sponsor / hosting partner based operation

Global Use Case Study research not limited to a specific region. Concentrated on the **Business Value** viewpoint of blockchain “not just technology”

Attendees: Ones holding the key

Representative Non-crypto Companies (Conglomerates/VCs/Leading Start-ups) from **top executives to action officers** who are taking the initiative in the organization (From teams including Investment / R&D / Blockchain TF / Management / Future strategy / Corporate VCs, etc)

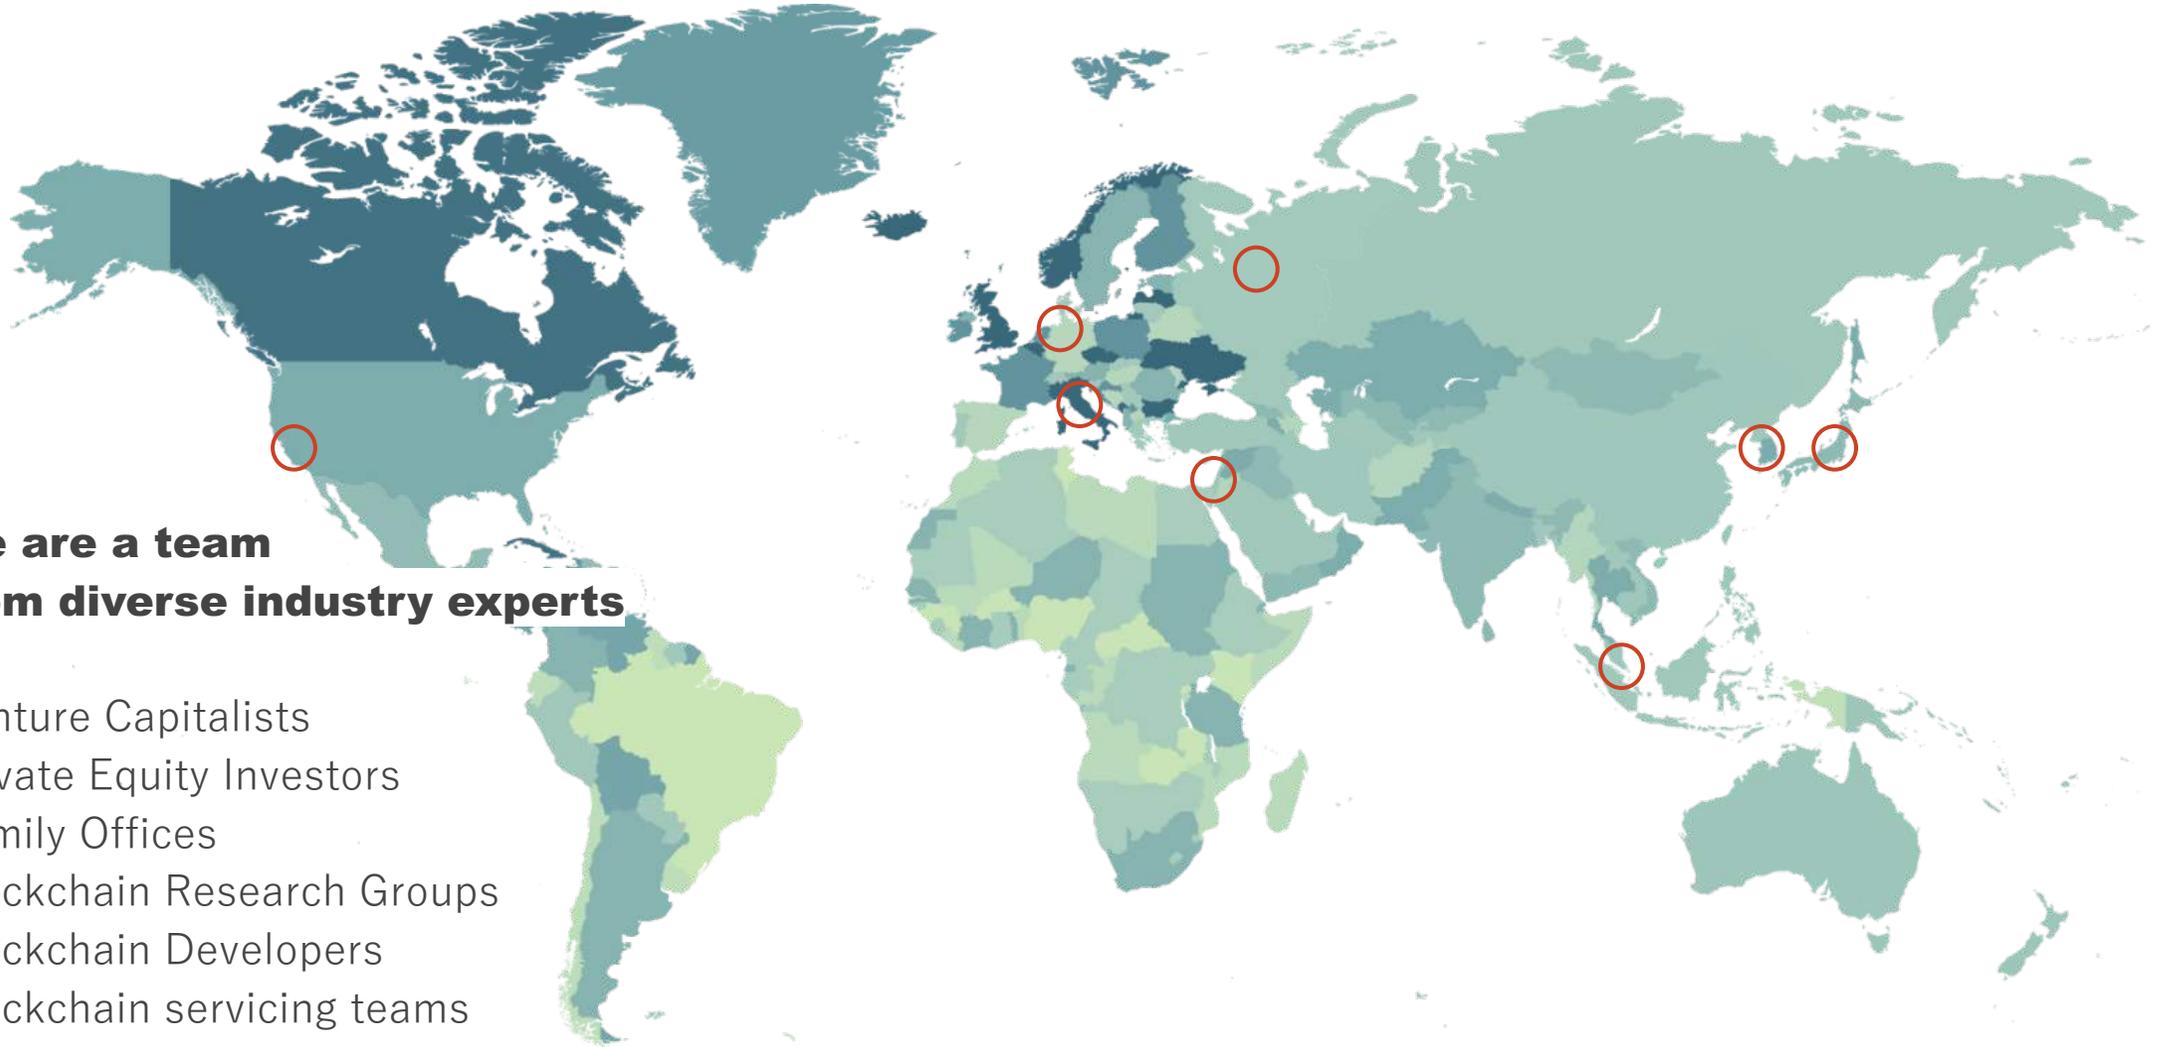

Closed & Invitation Only we target the right, concentrated audience without distraction

Contents Neutrally Curated we don't promote token sales and are strict on objectiveness

Aggregating business initiatives & lessons from trials from the scene

We work closely with global corporates approaching blockchain from traditional industries, To learn their pain-points, share what's happening now with blockchain in business & benchmark cases, and connect them to players who can trouble-shoot their issues, help them build right network for inter-corporate initiatives

We are a global team connected / working in different spaces

We are a team from diverse industry experts

- Venture Capitalists
- Private Equity Investors
- Family Offices
- Blockchain Research Groups
- Blockchain Developers
- Blockchain servicing teams

3. Seminars [Highlights] NFS Singapore 1st - Dec 14th, 2018

Local Host: Neo Global Capital, XSQ, Ascendas-Singbridge

Sponsor: Synpath (Korean VC)

Achievements

- Lightly advised / consulted 4 corporates on investment / business adoption until now
- Holding another session partnering up with a large global Fintech corporate, due to more request from corporates who were not able to attend

2. NFS Research Database

Diverse Industry Area

29 Industry Sectors for Research	
Advertisement	HR
Agriculture	Industry
Banking	Information Technology
Biotechnology	IT
Chemical	Logistics
Commerce + E-commerce	Manufacturing
Construction/Commerce	Medical / Pharmaceutical
Construction/Finance	Motor Vehicle
Education	NGO
Energy	Retail
Entertainment	Science, Tech & Engineering
Financial (Investment)	Telecommunication
Financial (Non-investment)	Transportation
Gaming	Travel
Government	

Expected Business Benefit from Blockchain

**IOT
(Access Control)**

Uncategorized other beneficial area from using blockchain

Report Configuration

- Company / Blockchain project profile
- Industry Trend / Pain Points
- Limits of existing solution
- Expected benefit from blockchain adoption
- Blockchain Adoption process/progress
- Limits in blockchain adoption
- Future plans

Database reaching +300 use cases of global corporate/entity blockchain adoption cases by Feb 2019

3. Seminars [Highlights] NFS Seoul 1st - Oct 24th, 2018

Sponsor: Samsung Ventures

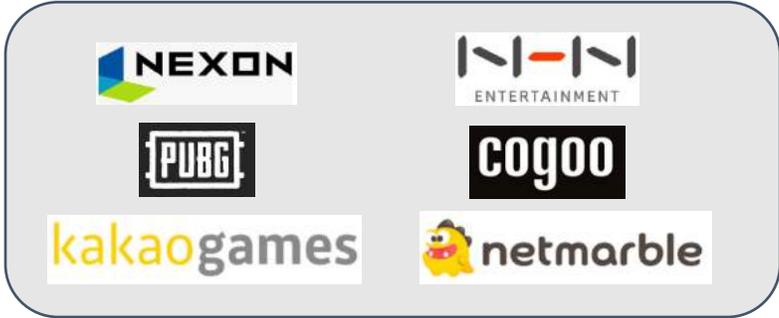

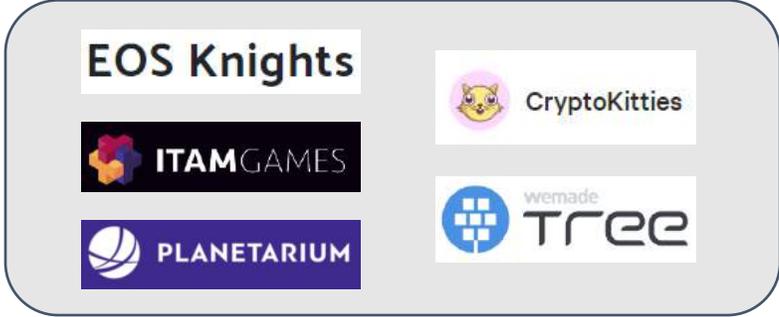

Achievements

- Forming 2 industry-level focused side sessions for blockchain public initiatives
- Connected 4 Projects to corporates for deeper review until now
- Lightly advised / consulted 3 corporates on investment / business adoption until now
- Holding another session soon due to more request from corporates who were not able to attend

4. Seminars [Highlights] NFS Game - Mar 5th, 2019

Seminar Contents	
INTRO - OPENING	
WHAT IS BEING DONE IN GAMES WITH BLOCKCHAIN?	
LANDSCAPE OF BLOCKCHAIN IN GAME INDUSTRY	
(BLOCKCHAIN GAME PROJECTS) WHAT HAVE BEEN TRIED OUT AND WHAT HAS NOT BEEN	SHORT SESSION SPEAKERS EOS knights for EOS - Myeongjin Shin Crypto kitties for Ethereum - Benny Giang Itam - Asung Gill Planetarium - KJ Suh Wemade tree - Seokhwan Kim TOPICS Development environments for game production on blockchain Difficulties of building games on blockchain Meaningful transactions in gaming
TRADITIONAL PLAYER APPROACH	TRADITIONAL BUSINESS USE CASE - Research from NFS Research Team
HOW TO ENGAGE?	
WHAT & HOW TO CHOOSE WHERE TO START	WHICH BLOCKCHAIN TO BUILD ON BASED ON MARKET DATA INTERNAL DATA FROM EOS KNIGHTS
BRAINSTORMING FOR NEED OF BLOCKCHAIN (USER'S PERSPECTIVE)	TOPICS TO BE DISCUSSED ON LIST BELOW - Moderated by Joony Koo Market places True ownership of digital assets (NFTs) User created content Transparency such as Gacha systems Leader boards decentralization Vs. hybrid model discussions on what is valuable to be on a blockchain Crowd-funding platform for games Porting of existing blockchain game Pay-outs as a payment gateway Building a community eSports
PANEL DISCUSSION (WHY BLOCKCHAIN GAME DEVS SHOULD NOT JUST GO FOR ICO) - Moderated by James Kim	

Local Host: Blockcrafters

Sponsor: SB Partners

Achievements

- Shared lessons from trials / errors / achievements
- Discussed how blockchain could be beneficial to game industry in 9 topics

4. Post-Seminar Activities

Inputs

Feedbacks from attending corporates

Survey, Follow-up meetings, Light consulting, Research requests

Inquiries on recommendation / connection to blockchain projects, teams that meet their needs

Outputs

Keep up to market reality to reflect on DB configuration & contents curation

Propose a short-list recommendation to right partners/targets with short diagnosis report

5. Milestone & Plans for Q1

	Target		
	2018 Q4 - Proof Testing Stage	2019 Q1 - Expansion Stage	2019 Q2 - Global Platform
Regional Coverage	Meaningful Regional Coverage in Asian Top-tier Corporates	<ul style="list-style-type: none"> Expand into Europe & CIS <ul style="list-style-type: none"> Russia (Confirmed) Germany (Confirmed) Strengthen Asia 	<ul style="list-style-type: none"> Expand into North America (US & Canada) and others
Contents	Research topic was more driven unstructured with more dependency on availability	<ul style="list-style-type: none"> Structured Database with Research Templates More global research partners 	<ul style="list-style-type: none"> Increase Quantity & Quality of Database More traditional global research partners
Session	Confirm Need/Demand Sharpening Session Structure	<ul style="list-style-type: none"> More audience focused contents (March 15th Seoul 2nd Session) Take initiative to drive industry with industry focused sessions (NFS Game Session - Mar 5th) 	<ul style="list-style-type: none"> Pilot project initiation with blockchain engaging players from more industry focused sessions

6. What we offer & How you can engage

Share & promote your experience & accomplishments

Way to prove the intrinsic value and capability of your blockchain product and service to corporates/organizations

Become a research partner to add value and find business opportunities from the very early phase - Insights & opportunity to find and validate early blockchain project

Subscribe as distribution partner to add value and also distribute business research on blockchain projects - Whitelisting the blockchain business research demand

Co-host in your region as our local hosting partner to strengthen your legit brand image and getting connected to institutions interested in Blockchain Business
Fast way to differentiate yourself from others in the crowded market

Apply for our qualified business partner to follow-up business requests after the seminar - Way to access to institutions with blockchain service needs & prove your business capability

More About Us

Cross Angle: Private corporate structured in Singapore. Aim to bring investworthy projects with investable tools. Focused on 1) Disclosure of crypto-financed projects & corporates 2) Well curated governance service between investors - projects. Formed of ex-founder/executive of successfully funded/launched ICO project from Singapore & ex-MD of a large VC in Korea.

Bitscale Capital: Bitscale Capital is a private investment firm structured in Switzerland with operations based in Moscow. Portfolio includes 40 blockchain projects (both tokens and equity). Mostly focused on infrastructure projects and platforms bringing new solutions and efficiency in fields like: Scalability, energy, security, real estate, identity & etc. Also holdings company is a well trusted family in Russia who owns business in production, vending, e-sports, restaurant businesses & also with vast experience and track on Fin-tech investments in various stage companies.

Hiraku VC: Hiraku VC is a private early stage fund focused on blockchain and crypto currencies. Since the beginning of 2017 the fund invested in a number of emerging teams around the world and has advised and supported several projects. With a strong focus on on founders and ethics Hiraku VC prides itself to bring benefit to the world through its activities. Stefano, the founder is also co-founder of Miss Bitcoin Band a PR and consulting firm with a deep network in Japan as well as globally. Stefano experience has always been between tech and investments as he managed his family office full time for the past 4 years. Among the most notable achievements, he managed funds in a multitude of asset classes including investing in interesting PE opportunities in Italy and built a web app to automate processes for a non-profit with his software development experience.

More About Us

nonce: nonce is a distributed network of independent business units and self-sovereign individuals dedicated to blockchain and humans. As revolutionary as blockchain technology is, we need a revolutionary way of living and working. We are a community operating out of an open (re)source co-living, co-working space in Korea. Our mission is to curate, connect, cultivate trustworthy people building trustless technologies - future rebels who stay true to decentralization.

Blocko: Founded in 2014, Blocko is a leading blockchain company in Korea with the most commercialized references in the domestic market. Blocko is an enterprise blockchain platform provider specialized in general purpose blockchain platform based on its proprietary platform, COINSTACK. Blocko has successfully implemented blockchain-based services with banks and financial institutions, local governments, and large conglomerates. Blocko develops and delivers blockchain technology to our clients, replacing conventional and inefficient processes and systems of 'trust'.

Layer X: Started as a JV between two strong tech companies (Gunosy Inc. and AnyPay Inc.) in Japan, Aug 2018. Focused on blockchain technology providing smart contract development, ICO tech consulting, smart contract audit, development & consultation relating to blockchain projects.

Our Solution – Xangle, Crypto Disclosure Platform

Xangle is a single source of reliable and exhaustive crypto project information. It is the DART or EDGAR equivalent for the global cryptocurrency market.

FAQ

Can Xangle, a non-government system, perform disclosure service?

1. Crypto is a global market that cannot be regulated by one national government.
2. Government legislation cannot be released as a test version.

Xangle aims to provide the basis to develop acceptable regulatory guidelines.
